

**Woulda.
Coulda.
Shoulda.**

Fire is not a covered peril in your crop insurance policy.

However, for the price of a half-bushel of corn or less, you can have \$500 or more coverage per acre.

This covers hail, fire and lightning, vandalism, transit, fire department costs and death.

**Insure with the Best
in the Field**

Or, consider adding separate fire coverage for as little as 25 cents per hundred dollar coverage.

We're farmers too. And, we specialize in Crop Insurance. It's the only thing we sell and we have over 40 years combined experience.
